

The Detroit, MI born Jaydee now 23 years old has been writing and rhyming through the influences of his struggles, experiences, pain, downfalls, and last but not least feelin of heart since 14. legal troubles nearly grazed him violating his probation from what he was doin alotta his friends got some court cases that sent most of them to a 3 to 5 in MN state prisons he finally started slowin down before he turned 19. A record label from NY, "50MM PRODUCTIONS" now "ECE entertainment" contacted Jaydee when they found him on soundclick. soon after that he took it upon himself to get himself to Staten Island, NY for Jaydee to record for some album material and also the labels mixtape. Since then, he's been making beats, gettin together with some of the hottest unsigned producers out there for collaborations (and not no bullshit he PAID for the beats for exclusive rights) unlike half you other rappers who just STEAL. Jaydee finally was turnin his life around, enrolled into college Fall of 2008 and is continueing with music, working with agents and promoters from Minnesota down to Missouri over to Michigan and on the east coast.
